

beyond desktop. create a
Utopia world with new
technologies and touching
stories

It is a sure answer that machines will encompass us. The human brain has flaws. That is why technology has been become and will be more tremendously be our extended mind. With the increasing intelligence of future technology, technology can be embedded anywhere at any time.

Technolgy grows,
always, faster than
you think.

- **Blake J. (2011)**

A natural user interface is a user interface designed to use natural human behavior for interacting directly with content.

设计 · beyond desktop. create a Utopia world with new technologies and touching stories

- Mark Weiser

The most profound technologies are
those that can disappear.

新宇宙 · New Universe

f() _metaverse = future virtual world

Now it's just a vision/buzzword/HYPE
It lacks a real meaning.

f() _future virtual world = *

Device-free
Gesture
Control
Wi-Fi

Hologram

Advanced Hologram Light Projection

Scientists have figured out how to manipulate tiny nearly unseen specks in the air and use them to produce images more realistic than most holograms.

Device-free Gesture Control

Wi-Fi

The project WiSee, a novel gesture recognition system that leverages wireless signals (e.g., Wi-Fi) to enable whole-home sensing and recognition of human gestures. This enables gesture control without requiring instrumentation of human body with sensing devices.

f() _future virtual world + touching story =

Interactive Film Experience

情感体验 · Emotional Experience

I call this formula
 $f(\text{)_future virtual world + touching story =$

Creation of Utopia

A utopia (/ju:'tɒʊpiə/ yoo-TOH-pee-ə)
typically describes an imaginary community
or society that possesses highly desirable or
nearly perfect qualities for its members.

I am proposing the idea of Story-centered Utopia, which is a new type of universe that goes way beyond our current universe. In the future, everyone will have their own Utopia. And we are together, creating a multi-universe utopias future.
